Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 7-15-08.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-7, 9-13, 15, 17-19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Brauer.

Brauer discloses in figures 1-4 a shell for an ankle brace A, being made of a semi-rigid material (col. 1, lines 21-23), having an inner surface (fig. 1), to conform to a side surface of a person's leg, on one side of the person's leg, an upper extent (the upper portion of A, above the person's ankle bone, on one side of the person's leg, a lower extent (the lower portion of A), below the person's ankle bone, on one side of the person's leg, a forward extent (fig. 1) a rearward extent (fig. 1) a registration portion (the portion of C that is the lower concaved portion located under reference element C in figure 4) and a slot (the opening between the two arms of C), the registration portion is provided by a hole (the lower concave portion of C inside the arms of C), the slot opens to a hole (the slot is the upper portion of the concave shape) and the opening is the lower portion of the concave shape), the slot stops short of the hole, the slot opens into the hole, the registration portion is provided by a recess in the inner surface of the shell, the slot extends as far as the recess, at least partly into the recess, the shell extends partly into the recess, the registration portion has a non-circular outline (fig. 4), the shell

is a generally uniform thickness, a means B for adjustable strapping the shell to the person leg, the shell has a forward projecting region (fig. 2) and a boot (fig. 1) used with the shell.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3, 16 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brauer.

Brauer discloses in figures 1-4 a shell for an ankle brace, substantially as claimed. However, Brauer doesn't disclose what the width of the slot is above the registration portion or what distance the projection region projects outwardly. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the width of the slot disclosed by Brauer could be the same distance as the distances recited in claims 2-3 and the projection portion could project the same distance as recited in claim 22 because these dimensions are design choices that don't provide any novelty or an inventive step over the prior art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nelson '926, Neal '195 and Wilkerson disclose shells for ankle braces.
